

Week 5: Cloud and API deployment

Name: Andrea Perez

Batch Code: LISUM17

Date: 2/4/2023

Submitted to: Data Glacier

- Built the prompt website design and code in python for connecting the user input data on Anvil.
- Made python code in jupyter notebook that would contain the data, connect the website to the uplink from Anvil, and make a callable function.
- Ran the jupyter notebook successfully and connected to the Anvil server.
- Published the app and generated a new name for the URL website.
