

## **Week 5: Cloud and API deployment**

**Name: Andrea Perez**

**Batch Code: LISUM17**

**Date: 25 April 2023**

**Submitted to: Data Glacier**

- Built the prompt website design and code in python for connecting the user input data on Anvil.
- Made python code in jupyter notebook that would contain the data, connect the website to the uplink from Anvil, and make a callable function.
- Ran the jupyter notebook successfully and connected to the Anvil server.
- Published the app and generated a new name for the URL website.
